

REVOLUTIONIZE E-DESIGN. ACCELERATE ELECTRIFICATION.

As experts in electrification since 2002, Powersys provide tailor-made solutions for accelerating the design of Electrical Power Systems for Electric Vehicles (EV) and Grid. Our objective is to help clients reach their climate and energy targets by decreasing time-to-market and designing more robust and optimized electric systems.

POWERSYS

OUR OFFER

A customized turnkey Design Factory inclusive of:

- EM & PE workflow experts
- EM & PE simulation engineers
- Simulation tools
- Power computing

OUR ADDED VALUES

- More than 20 years of simulation expertise
- A strong network of developer partners
- Massive calculation clusters
- Electrical engineering DNA

THEY TRUST US
